

This Amendment is being released to provide clarification to the questions that have been put forth in regards to the Space Forensics Interactive Game solicitation.

**1. What is the page limit, font size, etc.?**

There is no specific requirements for page limit or font size.

**2. Program narrative expectations?**

It is unclear whether this is asking about the narrative in the proposal of the work the vendor is going to provide, or the narratives of the Space Forensics cases that will be developed during the performed work. If the former, the technical considerations to be covered in the proposal narrative can be found in the solicitation. If the latter, as stated in the solicitation, the narratives for the Space Forensics cases are currently being developed by the Physics of the Cosmos/Cosmic Origins education and public outreach team.

**3. Past performance/capabilities expectations?**

As specified in the solicitation, additional factors that will be considered during vendor selection include the vendor's work on projects of this size and developing engaging interactive content for youth and public audiences.

**4. Project management expectations?**

As stated in the solicitation, the selected vendor is expected to manage their part of the project and communicate with the Physics of the Cosmos/Cosmic Origins education and public outreach team through regular status meetings.

**5. What is the dollar value of the proposed purchase?**

The Government will not be providing this information. Offerors are asked to assess the technical requirements and present a quote based off that assessment of the technical requirements.

**6. Is there a budget format?**

There is no budget format. The Government anticipates awarding a firm fixed-price acquisition.

**7. Will you require resumes of key personnel?**

We do not require such resumes.

**8. Are there any standard forms that need to be submitted?**

We have no specific standard forms.

**9. What is your review process?**

Selection and award will be made to that offeror whose offer will be most advantageous to the Government (See FAR 2.101, Best Value), with consideration given to the factors of technical merit, price, and past performance. Offers must provide: (1) adequate past performance information of at least three previous contracts held with Government Agencies or Private Industry, and (2) product literature or other information to allow the Government to determine technical merit.

**10. What are your specific guidelines for determining best value?**

Submitted proposals will be compared against the technical requirements and other factors, and the best value will be selected.

**11. What is your selection criteria?**

Selection and award will be made to that offeror whose offer will be most advantageous to the Government (See FAR 2.101, Best Value), with consideration given to the factors of technical merit, price, and past performance. Offers must provide: (1) adequate past performance information of at least three previous contracts held with Government Agencies or Private Industry, and (2) product literature or other information to allow the Government to determine technical merit.

**12. How is this different from the cancelled NNG13490267Q – Space Forensics game from 2013? There appears to be more information concerning the type of game (puzzle based), but other than that, exactly the same as before.**

This updated solicitation clarified the type and scope of work required, as well as the nature of long-distance collaboration on the effort.

**13. Will the game need to be responsive to different environments (desktop vs. tablet vs. mobile).**

As specified in the solicitation, “it is desired that the game be responsive and thus work, in modified form, on modern mobile Webkit-based browsers on devices including both tablets and smartphones.

**14. Does the Space Forensics team have different scoped games that need to be design and developed, or should our quote also include planning/scoping of each of the puzzle games, to be built in collaboration with the Space Forensics team?**

Some planning/scoping for each puzzle game should be included. As mentioned in the solicitation, the narratives and activities are currently under development, so the overarching storyline and content are known, but the specific scope for each puzzle game will need to be determined collaboratively.
